In the Matter of:
Amendment of Part 97 of the
Commissions Rules Governing
Amateur Radio Services
Regarding Repeater and
Auxilliary Operation in the
1.25 Meter band

PR 92-289
RM-7869

RECEIVED

JAN 30 1991

To: The Commission

PETITION FOR RULE MAKING

FCC MAIL BRANCH

Susan K. Nash, KC6DND, would respectfully submit an urgent
request to the Federal Communications Commission to NOT act on petitioner
RM-7869 for Rule Making, submitted by the American Radio
Relay League.

A loss of the lower 2 Megahertz portion of the 1.25 meter amateur band
frequency began a search for another frequency to compensate. Here in
Southern California, the members of the 220 spectrum Management Association
called a vote to determine allocations for the 1.25 meter band in the
Southern California. This association is recognized as the coordinating
body for frequency usage in the 1.25 meter band throughout Southern
California for Amateur Radio Operators. THIS AGREED UPON PLAN DID NOT
INCLUDE 150KHZ AT THE LOWER END OF THE BAND, where repeater inputs were not
allowed, as the American Radio Relay League is presently seeking in RM-
7869. The band plan passed by the members of the 220 Spectrum Management
Association DOES REFLECT our desire that repeater pairs existing remain for

FM repeaters. The band plan submitted by the American Radio Relay League
